KILLARNEY LAWN

Sow *Killarney*

LAWN SEED
and Walk on Velvet
FAMOUS SINCE 1905

HIGH GERMINATION AND PURITY • MAXIMUM FREEDOM FROM WEEDS • TESTED AND PROVED

KILLARNEY is a modern lawn seed mixture composed of the best imported and domestic grasses that will produce the finest and most permanent turf possible. Free of Ryegrass and Timothy, it is a carefully blended formula of the permanent, sod-forming grasses—Kentucky Blue, Chewing's Fescue, Fancy Redtop and Bent. In full sun or light shade, under ideal conditions **Killarney** will produce a deep-rooted, luxuriant, velvet turf that should last for years. We have carefully improved this mixture over the years and guarantee that a trial will convince you of its quality.

Prices (Transportation Paid):

Lb. \$1.75, 5 lbs. \$8.50, 25 lbs. \$41.25, 50 lbs. \$79.00, 100 lbs. \$155.00

Shady Place Lawn Seed Mixture for Dense Shade

A carefully proportioned mixture of shade-tolerant grasses that will produce a good turf in fully or partly shaded areas under trees. Soil under trees is in most cases impoverished and grass roots have to compete for food with the tree roots themselves. Therefore it is wise to fertilize liberally in early spring and early fall to keep the turf growing and in good condition. (We recommend the organic fertilizer **Agri-nite** for this purpose—see page 4.) If the soil is found to be too acid through dampness and lack of sunlight, add lime and work in well before seeding. Although particularly recommended for shaded areas, the proportion of grasses in **Shady Place** is sufficient to make it adaptable for use in both sunny and shady spots.

Prices (Transportation Paid):

Lb. \$1.70, 5 lbs. \$8.25, 25 lbs. \$40.00, 50 lbs. \$77.50, 100 lbs. \$148.50

GRASS SEED QUANTITIES For all general purposes, 1 lb. will sow 150 to 200 sq. ft.; 150 to 200 lbs. per acre. Use one-half these quantities when renovating an old lawn. **Consult Us About Your Lawn Problems—We Are At Your Service.**

Lawn Grass Seed Mixtures

The Satisfaction of a Perfect Lawn

A fine lawn is obtained by the careful and exact fulfillment of three fundamental requirements: careful preparation of the seed bed, the use of good grass seed and the proper maintenance of the turf once established. These three factors are of equal importance, and failure to meet any one of these requirements will make the efforts expended of little avail. Burnett Bros. Inc., with a reputation of supplying grass seeds of the highest quality since 1905, assumes the responsibility of guaranteeing good seed.

Permanent Turf with Merion Bluegrass

(Containing 100% Perennial Grasses)

Sensational new lawn seed mixture containing 45% of the "Miracle Grass," Merion Kentucky Blue, which differs from the well-known Kentucky Blue Grass, in that it is more resistant to heat and disease. Combined with Penn Lawn Red Fescue, Delta Kentucky Blue, Chewing's Fescue, and a small percentage of Fancy Redtop, this formula produces a thicker turf that stays green all summer and stands close mowing. This mixture does not grow quickly but once established will last indefinitely and thrives under a wide range of conditions. One pound covers three times as much as regular lawn mixtures, thus making it no more expensive to sow an equal area.

Lb. \$2.75, 5 lbs. \$13.25, 10 lbs. \$25.50, 25 lbs. \$62.50

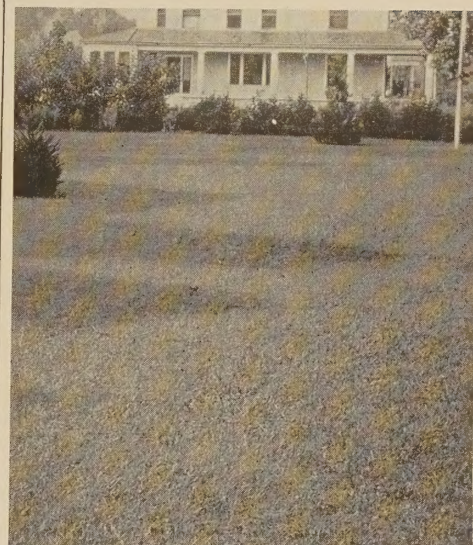

(Merion Kentucky Blue can be purchased separately; see Individual Grasses)

SPECIAL 'UTILITY' LAWN GRASS MIXTURE

Selected blend of quick-growing grasses that do well in good or poor soils. Will produce a rugged, lasting turf in difficult dry soils, play areas, etc. This mixture makes a serviceable lawn in sun or shade with ordinary care.

Lb. \$1.65, 5 lbs. \$8.00, 25 lbs. \$37.50, 50 lbs. \$70.00, 100 lbs. \$135.00

Bank and Terrace Lawn Mixture

Superb quality mixture of deep-rooting, strong-growing grasses that will provide a fine velvety lawn on banks and terraces. Established turf holds the soil and prevents erosion on these areas. Lb. \$1.70, 5 lbs. \$8.25, 12½ lbs. \$19.75, 25 lbs. \$38.50. (**Erosionet** aids in terrace building; see page 2.)

CLOVERS for LAWNS

Many turf enthusiasts object to the appearance of White Clover in their lawns, preferring just the uniform all-grass texture. We do not include it in our lawn mixtures and if desired it should be sown separately. (Use ¼ lb. per 1000 sq. ft.)

WHITE DUTCH CLOVER. Popular variety for lawns and pastures. Of vigorous growth, it will produce a green-sward where nothing else succeeds. ¼ lb. 90c, lb. \$2.50, 10 lbs. \$22.50.

WILD WHITE CLOVER. More permanent and spreading. Thrives on soils too poor for other Clovers. Dwarfier, smaller leaf and flowers less freely than regular White Dutch Lawn Clover. Resists drought and helps to keep crabgrass under control. ¼ lb. \$1.00, lb. \$3.00, 10 lbs. \$27.50.

AVOID TRANSPLANTING SHOCK WITH PLANT-A-POT

Plant-A-Pot has been used with great success in starting seedling plants. Moulded of peat moss. Plants growing in them can be set out in the garden without being removed from the pot. The roots, undisturbed by the operation, grow without check, penetrating the pot walls and continuing to grow while the pot disintegrates.

Decayed pot material contributes some plant food value to the plants. Seed may be sown directly in the pots. If they are placed in a shallow pan, water can be poured into the pan and will be absorbed through the side of the pots.

STRAWBERRY PLANTS— POT GROWN

Strawberry Plants are not difficult to grow and readily adapt themselves to a great variety of soils and climates. Pot-grown plants can be set out in the field at any time during the spring or late summer and early fall months, as their strong, fibrous roots take hold quickly in a new location and can be depended upon to produce bigger crops of larger berries than field-grown layer plants.

A careful selection of varieties will insure fresh berries in the garden from early June until late fall. This can be accomplished by choosing an **early**, a **midseason** and a **late** fruiting type as

indicated in the descriptions of varieties listed below. We recommend planting no less than 25 plants of a variety, for we know from experience that growing fewer plants does not give a satisfactory picking for a small family. **Book your order NOW.**

SHIPPING SEASONS. April 1 to May 15 and August 1 to October 15.

NOTE. Our plants are taken from growing frames, knocked out of pots, individually wrapped, packed in wooden boxes, and shipped by express. (Although not recommended, small lots can be shipped Parcel Post if necessary.)

STRAWBERRY CULTURE

PREPARATION OF SOIL: Dig bed for your plants to a depth of 14 inches and incorporate well-rotted manure (not fresh manure) or decomposed leaves with the soil. Afterward scatter bonemeal on each bed, raking it well into the surface.

PLANTING INSTRUCTIONS: When plants arrive, unpack at once and place in a shady spot, sprinkling them lightly with water. After hot sun has gone down in early evening, dip each root ball in a pail of water and loosen the soil with the fingers. Be careful not to knock soil from the roots. When planting, set the plants 1 foot apart in the row, spacing the rows 2 feet apart. Plants need a minimum of 6 hours of sun per day, so do not plant in very shaded locations.

RULES FOR SUCCESS: Most important rule is to keep weeds down by cultivating, which will also loosen the soil, preserve moisture and induce healthy growth. If good, clean salt hay is available, it is advisable to mulch the entire bed about the time green berries are forming, working hay well under the leaves. This practice keeps down weeds during the fruiting season, keeps berries clean and free from rot and preserves soil moisture. In early winter, mulch the beds with a light covering of coarse manure, evergreen boughs, salt hay or similar material.

Giant Single Asters — For Artistic Floral Arrangements

BURNETT'S BEAUTIFUL ASTERS

The introduction of a wilt-resistant strain of Asters has helped tremendously in restoring this beautiful flower to popular favor as a garden plant. Up until the time of the origination of this resistant strain, garden enthusiasts were becoming discouraged trying to grow Asters outdoors with the wilt disease so prevalent.

For best results the ground cannot be too richly prepared. Plants from seed sown in the open ground in May will bloom in September and October. For July and August flowers, sow in March or April in coldframes or hotbeds. We especially recommend the following as the best for cutting and general garden use.

MODERN PERENNIAL PLANTS

OUR OWN INTRODUCTIONS and SELECTED FAVORITES

Our perennial plants are all strong, field-grown or potted stock. They are vigorous, young plants that will readily establish themselves permanently in your garden. Do not buy perennial plants by size alone. Large, old clumps are never satisfactory and will soon die out when transplanted. **Plants are not sold in any quantities less than those priced.** 5 plants of any one variety are sold at the 10 rate. Take advantage of this saving over the smaller quantities.

Never plant hardy perennials too deep. As a rule, they prefer a well-drained, loamy soil that is neutral or slightly alkaline. Poor soil should be well prepared beforehand by digging in well-rotted manure with bonemeal added if possible. When fertilizing make sure no commercial fertilizers ever come in direct contact with plants, for this will burn young roots and lower foliage. Keep weeds down and soil loose around plants by frequent cultivation.

🌿 Varieties marked ★ are fine for rockeries

Plant PEAS Early 2 lbs. will plant about 100 ft. of drill

Peas do best in a light, rich soil; for home use sow in double rows 6 to 8 in. apart, the rows 2 to 4 ft. apart. The tall varieties require brush. Commence sowing the extra-early varieties as soon as the ground can be worked in March; continue for a succession every two weeks until June. A good crop can be secured by sowing the extra-early sorts in August for fall use. The wrinkled varieties are not as hardy as the small round sorts, and if planted early should have a dry soil, or they are liable to rot in the ground. They are, however, the sweetest and best flavored.
